NovaTech, LLC Volume 15 1st Quarter 2007 NovaTech, LLC Phone: 1-800-253-3842 www.novatechweb.com ~ The recent State of the Union address outlined a national energy policy that will include a sevenfold increase in domestic ethanol production in the coming decade. The decades of reliable service from the existing APCI - D/3 Process Automation System was a factor in their decision, but NovaTech's ability to upgrade legacy systems was perhaps more crucial.

Conversely, the SCADA Masters write data to Orion using DNP3.0 and the plant DCS reads these data using Modbus. Data Inputs Scaling The value's range required by the Master Device, as well as the value's range available in the End Device must be known, and configured in the Orion. Of course, the Data Input value originates in the End Device, whereas the Data Output value originates in the Master Device.
