Modulated IRIG-B Converter

Dual display adapter shown mounted on M570DA display without panel

Displays, Converters, Cables

Accessory Description

Bitronics M570DA: Optional display for use with M57x IED. Can connect one or two (with dual display adapter) per M57x to display up to 64 screens of up to 3 lines each plus programmable engineering units display. No power supply, power provided from M57x IED.

Bitronics M870D: Optional display for use with M57x or M87x IEDs. Can connect up to 15 per each M57x or M87x IED to display up to 64 screens of up to 3 lines each plus programmable engineering units display. Has wide-range universal power supply, nominal 24-250V dc/69-240V ac.

70 Series Utility CD: A CD shipped with each order containing the 70 Series Software (Configurator, BiView) plus electronic copies of the 70 Series user manuals.

RJ11 to DB9F Converter: A cable and converter to allow connection from the RJ11 port on the M57x IED to a DB9 connector on a PC. One per order is included at no extra charge; additional units can be purchased.

Modulated IRIG-B Converter: A converter with BNC connector that replaces one of the port 2, 3, or 4 connectors on a M87x IED allowing the IED to accept a Modulated IRIG-B signal.

Shielded Display Cable: 7 foot (2.13 meter) or 13 foot (3.96 meter) shielded cable with ferrite to connect M570DA to M571 that allows M570DA to be CE marked. One M570-CBLSHLD7F included with each M570DA. One M570-CBLSHLD7 (without ferrite) included with each M570-ADPT2 to connect adapter to M57x.

Dual Display Adapter: Mounts on a M570DA display and allows two M570DA displays to be connected to the P1 port of the M57x IED.

UL/CE Certification: M870D, M570DA, M570-ADPT2, and M870-MODIRIGBCV are UL/CSA recognized and CE marked. M570DA requires use of shielded display cable M570-CBLSHLD7F, M570-CBLSHLD13F or equivalent for CE mark.
